#### **DETAILED ACTION**

### Response to Arguments

Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

#### **Drawings**

The drawings corrections were received on October 6, 2003. These drawings are approved.

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The last line of claim 1 recites "where said extension prosthesis extends through another portion of said aneurysm". Applicant has claimed a portion of the body (another portion of said aneurysm), which is considered non-statutory subject matter. It is suggested to change "extends through" to recite --is configured to extend through--. Use of such language as configured, shaped, adapted, etc., eliminates the positive recitation of part of the body.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

<sup>(</sup>b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3738

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-6, and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Marcade (USPN 5,683,449). Marcade discloses a system for bypassing an aneurysm comprising a bypass prosthesis (112) having a proximal (136) and distal end (138 or 140), a stent (154) and a graft (152; fig.2), and an extension prosthesis (114 or 116) having a stent (154) and a graft (152; fig.2), the stent having a larger diameter at a proximal end (114a, 116a), with a flare (col.10, lines 12-15; col.11, lines 57-63), wherein the proximal end (114a, 116a) of the extension stent corresponds to the distal end (138, 140) of the bypass prosthesis (112, see fig. 1, 2, 3G, 3I), matingly engaging and overlapped to form a fluid tight seal (col.11, lines 3-8). Marcade discloses the bypass prosthesis (112) to inwardly taper (looking at it one way, the leg of 112 tapers inwardly from point 140 upward, looking at it another way, 112 taper inwardly downward, starting at a first diameter at 136 and having a smaller diameter at 140) and the extension prosthesis (114, 116) to outwardly taper (col.10, lines 12-15; col.11, lines 57-63). Marcade discloses a sealing prosthesis (110) configured to receive a proximal end (136) of the bypass prosthesis (112). Marcade discloses a connector for engaging the bypass (112) with the extension prosthesis (114, 116; col.18, lines 48-55). Marcade discloses an anchor in a distal portion of the extension prosthesis (the stent functions as an anchor, and barbs are also disclosed to be used). Marcade discloses at least two markers (142, 146, 126, 128, 124, 122) positioned on the bypass and extension prosthesis (fig.2; col.10, lines 22-30).

Art Unit: 3738

Claims 1-3, 5, 8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin (USPN 5,653,743). Martin discloses a system for bypassing an aneurysm comprising a bypass prosthesis (19) having a proximal and distal end, a stent and a graft (fig.5; col.4, lines 21-30, wherein graft refers to graft with support, col.2, lines 58-60), and an extension prosthesis (1) having a stent (3) and a graft (2), the stent (1) having a larger diameter at a proximal end (5; fig.1), with a flare, wherein the proximal end (5) of the extension stent (3) corresponds to the distal end of the bypass prosthesis (19; fig.5; col.4, lines 21-22), matingly engaging and overlapped to form a fluid tight seal. Martin discloses the bypass prosthesis (19) to inwardly taper (col.4, lines 21-22) and the extension prosthesis (1) to outwardly taper (fig.1; col.2, lines 61-65). Martin discloses a connector (stent functions as a connector) for engaging the bypass (19) with the extension prosthesis (1) and an anchor (stent functions as an anchor, or anchor could be 18, seen in fig.5) in a distal portion of the extension prosthesis (1).

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marcade (USPN 5,683,449). Marcade discloses a system having a bypass prosthesis (112) overlapping an extension prosthesis (114, 116) by a length (fig.1, 4, 3H), however is silent to disclose specific dimensions for the overlap. It would have been an obvious matter of design choice to have an overlap of 30-50mm, since such a modification would have involved a mere change in the size of

Art Unit: 3738

a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

#### Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 3738

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl Miller whose telephone number is (703) 305-2812. The examiner can normally be reached on Monday through Friday from 7:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott, can be reached on 308-2111. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
